

Cornelia C. Metges

Head of Institute of Nutritional Physiology, Leibniz Institute for Farm Animal Biology (FBN),
Dummerstorf, Germany

After studies of agriculture and animal science at the Technical University of Munich, Germany, Dr. Metges has worked in the field of human and animal nutrition with a focus on amino acid and protein metabolism at the Technical University of Munich, Germany, the German Institute of Human Nutrition in Potsdam, and the Massachusetts Institute of Technology in Cambridge, USA. Today she heads the Institute of Nutritional Physiology at the Leibniz Institute for Farm Animal Biology (FBN) in Dummerstorf, Germany. Her research interests are early nutrition, macronutrient metabolism and gut physiology. Dr. Metges is a lecturer of animal nutrition at the University of Rostock and has authored more than 180 scientific papers and book chapters and serves as a reviewer and advisor for various journals and research institutions and agencies.
